

Stellaplast Applications

in the INDUSTRIES

Contents

1	<i>Applications</i>	1
2	<i>Casestudies</i>	2
3	<i>DSB-References</i>	6

1 APPLICATIONS

- Drains
- Sumps
- Basins
- Relining of Steel Vessels
- Relining of brick-lined concrete Vessels
- Sewage water Tunnels
- Neutralisation pits
- Spinning machine area
- Salt water basins
- Electrolysis tanks

2 CASESTUDIES

Relining of brick-lined concrete basin

Relining of tiled sumps via DSB Steel plate Relining system

DSB Steel plate Relining system for Steel tanks

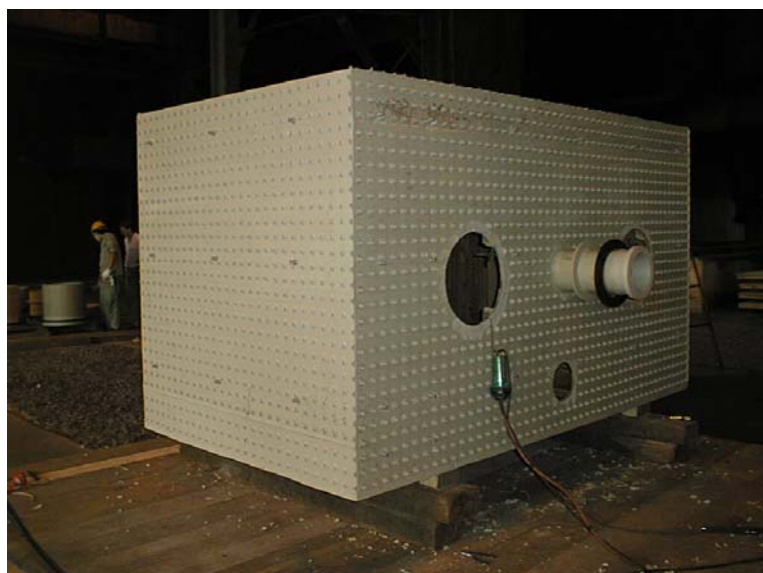

Relining of concrete slab

**Lining of Ceiling in
Neutralisation
Chamber**

**Nozzle-Lining for
P2O5 Attack tanks
made out of concrete**

**Prefabricated
Stellaplast basin**

**Prefabricated Sump in
Production area**

**Prefabricated Duple-
Wall Sump with
Detector Pipe for
Leakage indication in
production area**

**Prefabricated Drain
with odour cap and
laminated flanges for
synthetic resin
membrane connection**

Channel relining with prefabricated PE-Drain in Production area

Channel relining with prefabricated PE-Tube in Production area

Acid resistant Brick Foundation on Stellaplast floor

Relining of floor under
Spinning machines
with Stellaplast and
acid brick bloc-
foundations,
DIDIER SF, glued onto
laminated Stellaplast
